

SSH Setup & Configuration - V-1.0.0

Copies your SSH key to the VPS for passwordless login.

```
1. ssh-copy-id username@your_vps_ip
```

Adds the new server's SSH key to known hosts.

```
2. ssh-keyscan new-server-ip >> ~/.ssh/known_hosts
```

Creates an SSH config entry for easier login.

```
3. Host newserver
    HostName Ip-address
    User root
```

Connects to the new server using the simplified config.

```
4. ssh newserver
```

For changes in the command v-1.0.x

For new commands v-1.x.0

Completely new script v-x.0.0
